

# FUN FOR KIDS HD

-new children's game for iPhone and iPad

*Release October 20th, 2011*

Fun for Kids is a new children's game with focus on playing and learning. The app contains a rich picture book and three different games suitable for children of different ages. It's possible to choose your language among English, German, Spanish and Swedish.

## **Picture book**

The Picture book contains more than 70 pictures divided into four categories: animals, baby animals, things and vehicles. Touch the picture and a voice explains, in the language of your choice, what the picture depicts. The child also gets to hear, for example, what different animals sounds like.

## **Jigsaw puzzles**

Choose between several different puzzles specially designed for small children. Appealing motives and shapes stimulate motor and imagination.

## **One out of four**

An easy to use game with pictures from the picture book. Four pictures are shown at a time, and a voice instructs the child which picture to point at.

## **Memory**

A classic memory game with pictures from the four different categories, displaying six different pairs at a time. Flip the card up and the child gets to hear, for example, what the vehicle sounds like.

*- We saw a need for high quality games for small kids, says Andreas Öberg, founder of Tycero. We wanted to create games that can be used independently as well as in the company of an adult. One of our main goals was to add more than just one game type within the same app. Fun for Kids HD is not just your ordinary picture book.*

Fun for Kids HD is now available at the App Store for iPhone, iPad and iPod Touch at the cost of \$0.99.
